REFRESHER TRAINING – CONTAGIOUS DISEASES

• Is your PPE available?
• Limit personnel!
• Social distancing during waiting time!

I

• Only EMT/ECA does the initial patient assessment
• Use full PPE (gloves, goggles, FFP2 or N95 mask, gown)
• Use drivers help only if necessary. If needed, use full PPE.
• Surgical mask for patient, if condition allows!

II

• Remove drivers PPE before entering the Ambulance
• Separate the drivers compartment
• Ensure good air circulation during transport
• Inform the hospital

III

• Use special entrances!
• Is everybody informed?
• Does everybody have proper PPE?

IV

• Ventilate Ambulance for > 20 min.
• Clean Ambulance & equipment, remove your PPE
• Check if you are not contaminated
• Restock the Ambulance

These recommendations are complementary to the Ministry of Health recommendations in Rwanda and they don’t replace them. In case of conflicting statements, all recommendations and instructions from the Ministry of Health and the attending doctor/nurse prevail.
